Summary

Artifact	Status	File Path
Slides (presentation)	PASS	<code>slides/04_guerra2/guerra2.pdf</code>
Slides (notes)	PASS	<code>slides/04_guerra2/guerra2_notes.pdf</code>
Assignment	Skipped	N/A (non-methods course)
Solutions	Skipped	N/A (non-methods course)

Course type: Non-methods (no **assignments/** folder detected)

Reference materials used: FLS chapters 4 (Domestic Politics and War) and 5 (International Institutions and War), plus instructor outlines for both chapters.

Slides

Structure

Section	Frames	Content
(Intro)	1	Title page

Section	Frames	Content
La politica domestica y la guerra	5	Actors pyramid (tikz), rally effect, diversionary war, bargaining effect, Malvinas discussion
Militares y grupos de interes	3	Military-industrial complex, small-group influence, bargaining implications
La paz democratica	4	Empirical finding, four mechanisms (table), causal concerns, democracy promotion discussion
Alianzas	4	Definition, alliance dilemma, balance of power/Cold War, transition discussion prompt
Seguridad colectiva	4	Definition, collective action problem, peacekeeping vs. enforcement (two-column), IOs and bargaining
(Summary + closing)	2	I-I-I framework recap, “Preguntas?”
Total	23 frames (including title/closing)	

Assessment: 21 content frames for a ~90-minute lecture is appropriate (~4 minutes per slide). The addition of a third discussion prompt helps break up the back half of the lecture.

Compilation

- `guerra2.pdf`: 55 pages, compiles without errors
- `guerra2_notes.pdf`: 12 pages (4-on-1 layout), compiles without errors
- Overfull hbox warnings: all minor (2.12pt), from beamer footer template, not content issues

Visual Elements

- 1 TikZ diagram: domestic actors pyramid
- 1 table: democratic peace mechanisms (animated, 4 rows)
- 1 two-column comparison: peacekeeping vs. peace enforcement (new)
- 3 discussion prompt slides (1 existing + 1 new transition prompt)
- 3 image placeholders (commented out, see Images Needed below)

Teaching Notes

All 23 frames have `\note{}` blocks. Notes are detailed and include:

- Historical examples (Argentina 1982, Guatemala 1954, Japan 1930s, Bush/Obama, Cold War, Srebrenica, Rwanda)
- Connections to the bargaining model from session 03
- Discussion guidance and expected student responses
- Cross-session references (sessions 2 and 3)
- Preview of session 05 (terrorism, non-state violence)

Pedagogy Review

The pedagogy-reviewer agent identified the following issues:

Severity	Issue	Status
High	Very few visual elements (1 tikz across 19 slides)	Partially addressed – added image placeholders and restructured peacekeeping slide as two-column
Medium	No transition between Alliances and Collective Security	Fixed – added discussion prompt slide
Medium	Peacekeeping vs. peace enforcement needed side-by-side layout	Fixed – restructured as two-column
Medium	No discussion prompt in back half of lecture	Fixed – added transition discussion between sections
Minor	“Gambling for resurrection” lacked Spanish gloss	Fixed – added parenthetical

Strengths noted by reviewer:

- Strong narrative arc organized around I-I-I framework
- Excellent progressive complexity (inside state -> between states -> institutions above states)
- Rich teaching notes with numerous case studies
- Good Socratic embedding (now 3 discussion prompts)
- All frames have notes
- No sections with only 1 slide
- Consistent notation and terminology with session 03

Quality Score

Check	Result	Deduction
Compilation	Pass	0
Overfull hbox > 10pt	0	0
Sections with only 1 slide	0	0
Missing <code>\note{}</code> after frame	0	0
Overfull hbox <= 10pt	~80 (2.12pt, template)	-1 each (capped at -3)

Score: ~97/100 – Acceptable

Images Needed

The deck currently has no full-frame images. Three image placeholders have been added (commented out). To activate them, source the images and uncomment the corresponding frames.

Placeholder	Filename	Description	Where to find
NATO/Warsaw Pact map	<code>nato_warsaw_map</code>	Map of Europe showing NATO (blue) vs. Warsaw Pact (red) blocs during the Cold War. Opens the Alliances section.	Search: “NATO Warsaw Pact Cold War map Europe” – Wikipedia or academic sources
Democratic peace	<code>democratic_peace</code>	Graph, scatterplot, or matrix showing the absence of wars between consolidated democracies. Opens the Democratic Peace section.	FLS Figure 4.4, or search: “democratic peace empirical evidence graph”
UN peacekeeping map	<code>un_peacekeeping_map</code>	World map of active UN peacekeeping operations, or timeline/bar chart showing the post-1990 explosion of missions. Opens the Collective Security section.	Source: peacekeeping.un.org , or search: “UN peacekeeping operations map 2024”

Additionally recommended (not placeholders yet):

- `rally_effect_approval`: Chart showing presidential approval rating spikes after international crises (Bush post-9/11: 51% to 86%). Would enhance the rally-effect slide. Search: “rally round the flag effect approval ratings chart”
- `malvinas_1982`: Photo from the Falklands/Malvinas War for the discussion prompt slide. Search: “Falklands War 1982 Argentina”

All images should be placed in `pol_mundial/slides/img/`.

Issues Requiring Attention

1. Images are the main gap. The lecture is text-heavy compared to session 03 (which has 5 full-frame images). Sourcing at least 2-3 images would significantly improve visual rhythm and student engagement.
2. NATO map placeholder already existed (was commented out from original creation). The image just needs to be sourced and placed in `slides/img/`.
3. No `.bib` file. The deck doesn’t use bibliographic citations. If you want to add references, link a `.bib` file in the wrapper.
4. Content coverage is comprehensive. All topics from FLS chapters 4 and 5 are well covered: domestic actors, rally effect, diversionary war, military-industrial complex, collective action, democratic peace (mechanisms and critiques), alliances (types, dilemma, balance of power), and collective security (UN, peacekeeping, peace enforcement, IOs and bargaining).
